Qty	Name (index) and description of item	Item #
	36 Plus (33): Our best selling fluid. It is a high index general purpose arterial fluid.	1-36PL
	Rigid (38): 38 index arterial fluid designed to furnish a firm body.	1-RIGID
	Standard (32) For the most difficult cases we recommend this 32 index arterial fluid	1-STANDARD
	Tissue Guard 32 (32): Use in place of 36 Plus if you have a septic system	1-TISSG32
	Cell Guard 28 Natural (28): Provides a firm but not overly hard body, preservation is assured	1-CELLG28N
	Eotone (27): When a slightly firmer body is desired or a case calls for a little more preservative.	1-EOTONE
	Cell Guard 25 Natural (25): For firm but pliable tissue using water-soluble lanolin and high-quality humectants.	1-CELLG25N
	Flotone (25): Containing three disinfecting and preserving agents.	1-FLOTONE
	Lanol-Tex (22): When the soft, smooth skin texture supplied by lanolin is desired	1-LANOLTEX
	X-20 (20): For a soft but well-preserved life-like feel and appearance to the body and skin.	1-X20
	Natural Tone (20): Produces a pleasing cosmetic appearance and a mildly firm body.	1-NATTONE
	Perfect Tone (18): A low formaldehyde content arterial.	1-PERFTONE
	Premium Jaundice (8): Bleaches the color of bilirubin, facilitates the flushing of yellow pigment, and uses low level of formaldehyde.	1-PREMJAUN
	Solvool (6): Excellent for clearing the body to allow for better distribution and penetration of an arterial fluid.	1-SOLVOL
	Leak Guard: To prevent leakage of body fluids and to pull excessive moisture from the body.	1-LEAKG
	Water/Clot Guard: Counters hard water salts, prevents clotting, and activates glutaraldehyde.	1-WATCLOTG
	Rose Colortone Dye: a concentrated dye system.	1-ROSECOL
	Humectant: For cases showing signs of dehydration and helps to fill sallow tissue.	1-HUMECT
	Plasma Flo: For embalming bodies when congealed and clotted blood is anticipated.	1-PLASFLO
	Free Flo: Improves distribution and drainage by freeing capillaries of congealing blood.	1-FREEFLO
	Color Guard I - Jaundice Fluid: Changes yellow coloration to a red or rosy tone.	1-COLOG I
	Tissue Aid: Contains special moisture retaining compounds known as natural colloids.	1-TISSAID
	Cavity King (25) When the security of plenty of formaldehyde and good penetration is desired.	1-CAVKING
	Dry Guard (21): Special formula results in excellent penetration and preservation of tissue.	1-DRYG
	5-Purpose Cavity (8): Penetrates deeply into tissue difficult to treat or reach.	1-5PUR
	Cavity 55 (8) A low odor, formaldehyde with good disinfection and deodorizing capability.	1-CAV55
	Premium Cavity (7): With five potent preservatives and disinfectants	1-PREMCV
	STOP Chemical of choice for controlling tissue gas. (NOT AVAIL AS PART OF THE FREE CASE)	1-STOP

24 total bottles.
